

PUSH PRINT

ROLLER BANNER

TEMPLATE SPECS

BANNER ARTWORK SIZE

800 x 2000 mm

BANNER ARTWORK INC BLEED

806 x 2006 mm

SETUP SPEC

- **SCALE:** Supply at full size (100% scale).
- **BLEED:** Add 3mm of bleed to all four sides and extend your background image or colour fully into the bleed area.
- **RESOLUTION:** 300PPI resolution is required (less than this and we cannot guarantee a high quality output).
- **COLOUR SPACE:** Colour should be CMYK throughout – no RGB or spot colours (these will be converted to CMYK for print and colour shift may occur).
- **SAFETY:** We recommend a 10mm safety margin all round to ensure all important text, logos and info is visible
- **BLACKS:** For a good strong even black, make your blacks CMYK 40 / 30 / 30 / 100.
- **EMBED:** Embed all placed images / logos / graphics, or flatten everything for print.
- **TEXT:** Outline all text and outline all strokes, where possible. This will counteract any font issues or problems with thin lines.
- **CROP MARKS:** Export your artwork WITH crop marks only - NO other printers marks, please.

SUPPLY FOR PRINT AS A

- Press Quality PDF
- Flattened TIF, or
- High Quality JPG.
