SETTING UP YOUR ROLLER BANNER FOR PRINT AT PUSH

FINISHED BANNER SIZE
800 x 2000 mm

**BANNER SIZE WITH BLEED**
806 x 2006 mm

SETUP SPEC

- **SCALE**: Supply at full size (100% scale).
- **BLEED**: Add 3mm of bleed to all four sides and extend your background image or colour fully into the bleed area.
- **RESOLUTION**: 300DPI resolution is required (less than this and we cannot guarantee a high quality output).
- **COLOUR SPACE**: Colour should be CMYK throughout – no RGB or spot colours (these will be converted to CMYK for print and colour shift may occur).
- **SAFETY**: We recommend a 10mm safety margin all round to ensure all important text, logos and info is visible
- **BLACKS**: For a good strong black, make your blacks CMYK 40 / 30 / 30 / 100.
- **EMBED**: Embed all placed images / logos / graphics, or flatten everything for print.
- **TEXT**: Outline all text and outline all strokes.
- **CROP MARKS**: Export your artwork WITH crop marks but NO other printers marks.

Thank you!

PRODUCT SPEC

Printed on durable, scratch-resistant 220mic banner PVC, our standard roller banners come pre-fitted into their stand with a sturdy pole, swing-out feet for stability and a carry case.

SUPPLY YOUR PRINT FILE AS A...

- Press Quality PDF,
- Flattened TIF, or
- High Quality JPG

If you are using Canva to create your artwork, please request our handy Canva artwork and print setup guide PDF.

Still need some help?

If you need any assistance or have any questions about the specs, the setup, saving or submission, please call Push on 0141 332 0072 or drop us an email at studio@pushprint.net where one of the studio team will be more than happy to help!
